

SAFETY DATA SHEET AMSOIL Synthetic Power Steering Fluid

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

1. Identification	
Product identifier	
Product name	AMSOIL Synthetic Power Steering Fluid
Product number	PSF
Recommended use of the che	emical and restrictions on use
Application	Power Steering Fluid.
Uses advised against	No specific uses advised against are identified.
Details of the supplier of the s	afety data sheet
Supplier	AMSOIL INC. Bordner, Ladner, Gervais Scotia Plaza, 40 King St W Toronto, ON, Canada M5H 3Y4 T: +1 416-367-6547
Manufacturer	AMSOIL INC. One AMSOIL Center, Superior, WI 54880, USA. T: +1 715-392-7101 compliance@amsoil.com
Emergency telephone numbe	<u>r</u>
Emergency telephone	CHEMTREC: Within USA and Canada: 1-800-424-9300 Outside the USA and Canada: +1 703-741-5970 (collect calls accepted) 24/7
2. Hazard(s) identification	
Classification of the substance	e or mixture
OSHA/WHMIS Regulatory Status	This Product is not Hazardous under the OSHA Hazard Communication Standard and according to the hazard criteria of the Hazardous Product Regulations.
Physical hazards	Not Classified
Health hazards	Not Classified
Environmental hazards	Not Classified
Label elements	
Hazard statements	NC Not Classified
Supplemental label information	AT(i) 3.9421% of the mixture consists of ingredient(s) of unknown acute inhalation toxicity.
Other hazards	

This product does not contain any substances classified as PBT or vPvB.

3. Composition/information of	on ingredients	
Mixtures		
Hydrogenated base oil	25 - <50)%
CAS number: 72623-87-1		
Classification Asp. Tox. 1 - H304		
Dec-1-ene, homopolymer, l oligomers, hydrogenated	nydrogenated Dec-1-ene, 10 - <25	;%
CAS number: 68037-01-4		
Classification Asp. Tox. 1 - H304		
Hydrogenated base oil CAS number: 64742-55-8	1 - <2.5	;%
Classification Asp. Tox. 1 - H304		
The full text for all hazard sta	atements is displayed in Section 16.	
Composition comments	The exact percentage is withheld as a trade secret in accordance with 29 CFR 1910.1200.	
4. First-aid measures		
Description of first aid measured	ures	
General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medic personnel.	cal
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Skin Contact	Remove affected person from source of contamination. Rinse immediately with plenty of water.	
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.	
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.	
Most important symptoms an	Most important symptoms and effects, both acute and delayed	
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.	
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents ma be inhaled, resulting in the same symptoms as inhalation.	iy

Resonance May cause temporary eye irritation. Indication of immediate medical attention and special treatment needed Notes for the doctor Treat symptomatically. Specific treatments No special treatment required. 5. Fire-fighting measures Extinguishing media Suitable extinguishing media Do not use water fog. Use fire-extinguishing media suitable for the surrounding fire. Unsuitable extinguishing Do not use water jet as an extinguisher, as this will spread the fire. Specific heardments Containers can burst violently or explode when heated, due to excessive pressure build-up. Hezardous combustion products may include the following substances: products Thermal decomposition or combustion products may include the following substances: products excessive pressure build-up. Advice for firefighters Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to fames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protectime stopping the leak. Special protective equipment Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective cothing. Standard Firefighter's dorthing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Cocupational Health and Safety Regulations. By provincial guidelines			
Indication of immediate medical attention and special treatment needed Notes for the doctor Treat symptomatically. Specific treatments No special treatment required. 5. Fire-fighting measures Extinguishing media Suitable extinguishing media The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire. On to use water jet as an extinguisher, as this will spread the fire. Do not use water jet as an extinguisher, as this will spread the fire. Specific hexards Containers can burst violently or explode when heated, due to excessive pressure build-up. Hexardous combustion products may include the following substances: products Harmful gases or vapors. Advice for firefighters Protective actions during water spray and remove them from the fire area if a can be done without risk. Cool containers exposed to heat with water spray and remove them from the fire is out. If a teak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Special protective equipment for firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidentis is defined by the Canada Cocupational Health and Safety Regulations, by provincial guidelines on occupational Health and Safety Regulations, by provincial guidelines on occupational Health and safety or by NFPA standards if applicable. 6. Accidental release measures Avoid discha	Skin contact	Prolonged contact may cause dryness of the skin.	
Notes for the doctor Treat symptomatically. Specific treatments No special treatment required. 5. Fire-fighting measures Extinguishing media Suitable extinguishing media The product is not flammable. Extinguishing media suitable for the sumounding fire. Unsuitable extinguishing media Do not use water jet as an extinguishing media suitable for the sumounding fire. Special hazards arising from the substance or mixture Special hazards arising from the substance or mixture Special hazards and sumous composition or combustion products may include the following substances: Harmful gases or vapors. Hazardous combustion Advice for firefighters Protective actions during fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to filenes with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Special protective equipment Vear positive-pressure self-contained treating appartus (SCRA) and appropriate protective clothing. Standard Firefighters clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety yor by NFPA standards if applicable. 6. Accidental release measures: Personal precautions, protective equipment and emergency procedures Personal precau	Eye contact	May cause temporary eye irritation.

7. Handling and storage	Reference to other sections	For personal protection, see Section 8. For waste disposal, see Section 13.	
	7. Handling and storage		

Precautions for safe handling

Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid contact with used product. Do not reuse empty containers. Avoid the formation of mists.
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
Conditions for safe storage, including any incompatibilities	
Storage precautions	Store away from incompatible materials (see Section 10). Keep container tightly closed, in a cool, well ventilated place. Protect containers from damage.
Storage class	Chemical storage.
Specific end uses(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.
8. Exposure Controls/persona	I protection
Control parameters	
Occupational exposure limits	
Comments	The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.
Under conditions which may g Long-term exposure limit (8-h	penerate mists, the following exposure limits are recommended: our TWA): 5 mg/m³

Short-term exposure limit (15-minute): 10 mg/m³

Exposure controls

Appropriate engineering controls	Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and safety at work.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.

Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn.
Environmental exposure controls	Not regarded as dangerous for the environment.

9. Physical and Chemical Properties

Information on basic physical and chemical properties

information on basic physical a	
Appearance	Liquid.
Color	Yellow. Brown.
Odor	Mild hydrocarbon.
Odor threshold	Not available.
рН	Not available.
Melting point	Not available.
Initial boiling point and range	Not available.
Flash point	226°C Cleveland open cup. [ASTM D 92]
Evaporation rate	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	0.8368
Solubility(ies)	Not known.
Partition coefficient	Not available.
Auto-ignition temperature	Not available.
Decomposition Temperature	Not available.
Viscosity	32.3 cSt @ 40°C 7.2 cSt @ 100°C [ASTM D 445]
Explosive properties	Not considered to be explosive.
Oxidizing properties	Does not meet the criteria for classification as oxidizing.
Fire point	250°C Cleveland open cup. [ASTM D 92]
Pour point	-54°C [ASTM D 97]
10. Stability and reactivity	

Reactivity	See the other subsections of this section for further details.	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.	
Possibility of hazardous reactions	No potentially hazardous reactions known.	
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.	
Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.	
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.	
11. Toxicological information		
Information on toxicological eff	fects	
Toxicological effects	Not regarded as a health hazard under current legislation.	
Acute toxicity - oral Notes (oral LD₅₀)	Based on available data the classification criteria are not met.	
Acute toxicity - dermal Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.	
Acute toxicity - inhalation Notes (inhalation LC ₅₀)	Based on available data the classification criteria are not met.	
Skin corrosion/irritation Animal data	Based on available data the classification criteria are not met.	
Serious eye damage/irritation Serious eye damage/irritation	Based on available data the classification criteria are not met.	
Respiratory sensitization Respiratory sensitization	Based on available data the classification criteria are not met.	
Skin sensitization Skin sensitization	Based on available data the classification criteria are not met.	
Germ cell mutagenicity Genotoxicity - in vitro	Based on available data the classification criteria are not met.	
Carcinogenicity Carcinogenicity	Based on available data the classification criteria are not met.	
IARC carcinogenicity	None of the ingredients are listed or exempt.	
Reproductive toxicity Reproductive toxicity - fertility	Based on available data the classification criteria are not met.	
Reproductive toxicity - development	Based on available data the classification criteria are not met.	
Specific target organ toxicity - single exposure		
STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure	

STOT - single exposure Not classified as a specific target organ toxicant after a single exposure.

Specific target organ toxicity - repeated exposure		
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.	
Aspiration hazard		
Aspiration hazard	Based on available data the classification criteria are not met.	
General information	No specific health hazards known. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.	
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.	
Skin Contact	Prolonged contact may cause dryness of the skin.	
Eye contact	May cause temporary eye irritation.	
Route of exposure	Ingestion Inhalation Skin and/or eye contact	
Target Organs	No specific target organs known.	
Medical considerations	Skin disorders and allergies.	

Specific target organ toxicity - repeated exposure

Toxicological information on ingredients.

Hydrogenated base oil

Acute toxicity - oral	
Notes (oral LD₅₀)	LD₅₀ > 5000 mg/kg, Oral, Rat Read-across data. REACH dossier information.
Acute toxicity - dermal	
Notes (dermal LD₅₀)	LD_{50} > 5000 mg/kg, Dermal, Rabbit Read-across data. REACH dossier information.
Acute toxicity - inhalation	
Notes (inhalation LC_{50})	LC_{50} > 5.53 mg/l, Inhalation, Rat 4 hours Read-across data. REACH dossier information.
Skin corrosion/irritation	
Animal data	Dose: 0.5 ml, 24 hours, Rabbit Erythema/eschar score: Very slight erythema - barely perceptible (1). Edema score: No oedema (0). Read-across data. REACH dossier information. Not irritating.
Serious eye damage/irritat	ion
Serious eye damage/irritation	Dose: 0.1 ml, 30 seconds, Rabbit Cornea score: 0 Iris score: 0 Conjunctivae score: 0.33 Read-across data. REACH dossier information.
Skin sensitization	
Skin sensitization	Buehler test - Guinea pig: Not sensitizing. Read-across data. REACH dossier information.
Germ cell mutagenicity	
Genotoxicity - in vitro	Chromosome aberration: Negative. Read-across data. REACH dossier information.
Reproductive toxicity	
Reproductive toxicity - fertility	Screening - NOAEL > 1000 mg/kg/day, Oral, Rat P Read-across data. REACH dossier information.
Specific target organ toxici	tv - repeated exposure

Specific target organ toxicity - repeated exposure

STOT - repeated exposure	LOAEL 125 mg/kg/day, Oral, Rat Read-across data. REACH dossier information.
Aspiration hazard	
Aspiration hazard	Aspiration hazard if swallowed.
Dec-1-ene	e, homopolymer, hydrogenated Dec-1-ene, oligomers, hydrogenated
Acute toxicity - oral	
Notes (oral LD₅₀)	LD₅₀ >5000 mg/kg, Oral, Rat REACH dossier information. Based on available data the classification criteria are not met.
Acute toxicity - dermal	
Notes (dermal LD₅₀)	LD₅₀ >2000 mg/kg, Dermal, Rat REACH dossier information. Based on available data the classification criteria are not met.
Acute toxicity - inhalation	
Notes (inhalation LC ₅₀)	LC_{50} >5.2 mg/l, Inhalation, Rat REACH dossier information. Based on available data the classification criteria are not met.
Skin corrosion/irritation	
Animal data	Dose: 0.5 mL, 24 hours, Rabbit Erythema/eschar score: No erythema (0). Edema score: No oedema (0). Primary dermal irritation index: 0.5 REACH dossier information. Based on available data the classification criteria are not met.
Serious eye damage/irritation	on
Serious eye damage/irritation	Dose: 0.1 mL, 72 hours, Rabbit Not irritating. REACH dossier information. Based on available data the classification criteria are not met.
Skin sensitization	
Skin sensitization	Guinea pig maximization test (GPMT) - Guinea pig: Not sensitizing. REACH dossier information. Based on available data the classification criteria are not met.
Germ cell mutagenicity	
Genotoxicity - in vitro	Gene mutation: Negative. REACH dossier information. Based on available data the classification criteria are not met.
Genotoxicity - in vivo	Chromosome aberration: Negative. REACH dossier information. Based on available data the classification criteria are not met.
Reproductive toxicity	
Reproductive toxicity - fertility	One-generation study - NOAEL 1000 mg/kg/day, Oral, Rat P REACH dossier information. Based on available data the classification criteria are not met.
Aspiration hazard	
Aspiration hazard	Aspiration hazard if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.
ogical Information	
	rded as dangerous for the environment. However, large or frequent spills may have us effects on the environment.
Based or	n available data the classification criteria are not met.

Ecological information on ingredients.

Hydrogenated base oil

Acute aquatic toxic	ty
Acute toxicity - fish	LL₅₀, 96 hours: > 100 mg/l, Pimephales promelas (Fat-head Minnow)
Acute toxicity - aqua invertebrates	atic EL₅₀, 48 hours: > 10000 mg/l, Daphnia magna
Acute toxicity - aqua plants	atic NOEL, 72 hours: > 100 mg/l, Pseudokirchneriella subcapitata
De	ec-1-ene, homopolymer, hydrogenated Dec-1-ene, oligomers, hydrogenated
Toxicity	Based on available data the classification criteria are not met. Aquatic toxicity is unlikely to occur.
Acute aquatic toxic	ty
Acute toxicity - fish	LL₅₀, 96 hours: >1000 mg/l, Oncorhynchus mykiss (Rainbow trout)
Acute toxicity - aqua invertebrates	atic EL₅₀, 48 hours: >1000 mg/l, Daphnia magna
Acute toxicity - aqua plants	atic EL₅₀, 72 hours: >1000 mg/l, Selenastrum capricornutum
Acute toxicity - microorganisms	NOEC, 28 days: 2 mg/l, Activated sludge
Chronic aquatic tox	icity
Chronic toxicity - ac invertebrates	uatic NOELR, 21 days: 125 mg/l, Daphnia magna
Persistence and degradability	
Persistence and degradability	he degradability of the product is not known.
Ecological information on ingredi	ents.
	Hydrogenated base oil
Biodegradation	Water - Degradation 31%: 28 days Inherently biodegradable.
De	ec-1-ene, homopolymer, hydrogenated Dec-1-ene, oligomers, hydrogenated
Persistence and degradability	Not readily biodegradable.
Biodegradation	Water - Degradation 2%: 28 days
Bioaccumulative potential	
Bio-Accumulative Potential	lo data available on bioaccumulation.
Partition coefficient	Not available.
Ecological information on ingredi	ents.
De	ec-1-ene, homopolymer, hydrogenated Dec-1-ene, oligomers, hydrogenated
Partition coefficient	log Pow: >6.5
Mobility in soil	

Mobility	No data available.	
Ecological information on ingredients.		
	Dec-1-ene, homopolymer, hydrogenated Dec-1-ene, oligomers, hydrogenated	
Mobility	The product is insoluble in water.	
Surface tension	27-29 mN/m @ 20°C	
Other adverse effects		
Other adverse effects	None known.	
13. Disposal considerations		
Waste treatment methods		
General information	The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.	
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.	
14. Transport information		
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT, TDG).	
UN Number		
Not applicable.		
UN proper shipping name		
Not applicable.		
Transport hazard class(es)		
Transport labels No transport warning sign required.		
Packing group		
Not applicable.		
Environmental hazards		
Environmentally Hazardous Substance No.		
Special precautions for user		
Not applicable.		
DOT TIH Zone	Not applicable.	

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

CAA Accidental Release Prevention The following ingredients are listed or exempt: *Sulfur dioxide* Threshold Quantity: 5000 lbs

SARA (311/312) Hazard Categories

None of the ingredients are listed or exempt.

OSHA Highly Hazardous Chemicals

The following ingredients are listed or exempt:

Sulfur dioxide Threshold Quantity: 1000 lbs

US State Regulations

California Proposition 65 Carcinogens and Reproductive Toxins The following ingredients are listed or exempt: *Ethylbenzene*

Known to the State of California to cause cancer.

Sulfur dioxide

Known to the State of California to cause developmental and reproductive toxicity.

Naphthalene Known to the State of California to cause cancer.

Ethyl acrylate Known to the State of California to cause cancer.

Trimethyl phosphate

Known to the State of California to cause cancer.

Toluene

Known to the State of California to cause developmental and female reproductive toxicity.

Benzene

Known to the State of California to cause cancer, developmental and male reproductive toxicity.

California Air Toxics "Hot Spots" (A-I)

The following ingredients are listed or exempt:

Ethylbenzene Xylene Butan-1-ol Phosphoric acid Naphthalene

Ethyl acrylate

Trimethyl phosphate

Toluene

Benzene

California Air Toxics "Hot Spots" (A-II)

None of the ingredients are listed or exempt.

California Directors List of Hazardous Substances

The following ingredients are listed or exempt:

Ethylbenzene

Xylene

Butan-1-ol

Phosphoric acid

Sulfur dioxide

Octane

Nonane

Naphthalene

Ethyl acrylate

Toluene

Benzene

Massachusetts "Right To Know" List

The following ingredients are listed or exempt:

Ethylbenzene

Xylene

Butan-1-ol

Phosphoric acid

Sulfur dioxide

Octane

Nonane

Naphthalene

Ethyl acrylate

Trimethyl phosphate

Toluene

Benzene

Hydrogenated base oil

Rhode Island "Right To Know" List
